

BOARDWALK BOUTIQUE

Introduction

Website

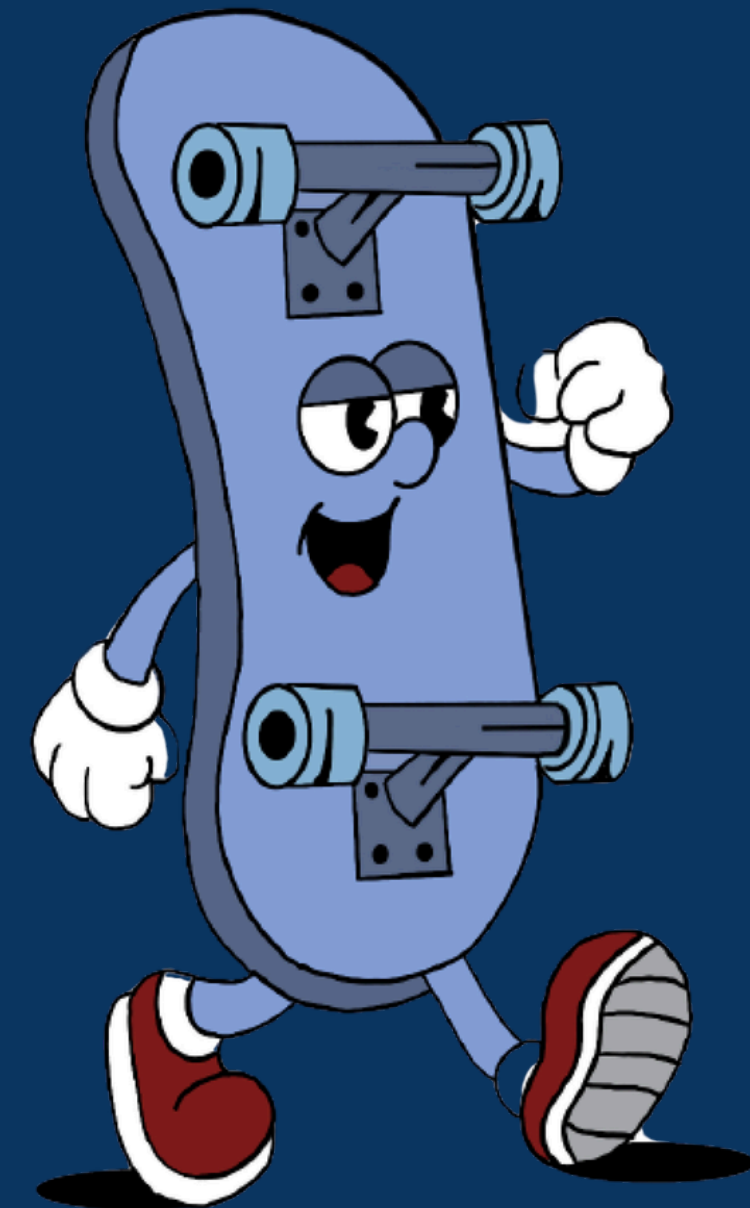

- Ecommerce website that focuses on renting skateboards and sells skate-aesthetic clothing
- Based in Vancouver, BC
- **Functionality** includes: rental services online ordering (purchasing), wishlist and product catalog.
- **Target audience:** 18-30 year old

Our Story

Located in the heart of Vancouver, BC, Boardwalk Broadway is the go-to destination for skaters and streetwear enthusiasts. Specializing in cutting-edge skater clothing, Boardwalk Boutique offers a diverse range of apparel and accessories that blend style, durability, and the latest trends. From graphic tees and hoodies to rugged jeans and snapbacks, our collection is curated to cater to the unique tastes of the skateboarding community.

In addition to our extensive clothing line, Boardwalk Broadway also **rents out** high-quality skateboards, ensuring both beginners and seasoned skaters have access to top-tier equipment. Whether you're looking to upgrade your wardrobe, find the perfect gift, or rent a board for a day at the park, our knowledgeable and friendly staff are here to help you every step of the way. Join us at Boardwalk Boutique and experience the ultimate skate culture right in Vancouver's vibrant downtown area.

Our Team

Courtney Yan
Project manager

Vahan Vartanian
Creative Designer

Sonya Yeh
UI/UX Designer

Karleil Villareal
UI/UX Designer

Daniel Kolpakov
Developer

Team Roles

Courtney Project Manager

Organized and delegated team members during meetings, created Gantt Chart and WBS. Finalized report and presentation

Vahan Designer

Created logo, style tile and design assets. In charge of the overall branding and look of the company.

Sonya UI/UX Designer (App Designer)

Created wireframes and prototypes to demonstrate user interactions and phone app functionality for the project

Karleil UI/UX Designer (Website)

Created wireframes and prototypes to demonstrate user interactions and website functionality for the project

Daniel Developer

Created and developed email template for brand, overlooked all development aspects.

Waterfall Methodology

OUR PROGRESS

Progress

During week 0, groups were assigned and members had to meet each other through a virtual meeting. This was the week when roles were assigned and what tasks were discussed. The project manager also started on the WBS

Week 1 (July 19th)

During week 1, the WBS was finalized and the Gantt Chart was started by the project manager. Initial tasks were identified and assigned. Members started researching for inspiration and a Figjam was created for the entire team.

Week 2 (July 26th)

During week 2, the initial Gantt Chart was finished. The creative designer completed their deliverable and completed the logo, moodboard and style tile. Both UI/UX designers were able to find inspirations and created their initial drafts. The developer also updated members with their progress.

Progress (cont.)

Week 3 (August 2nd)

During week 3, as the creative designer finished their tasks, they were able to help members collect photos for the app mockups. As well, a secondary logo was created to help aid the creative design with the email template. The hi-fidelity mockups for the website was completed

Week 4 (August 9th)

During week 4, members met up for their weekly meeting, to update what was going on with their assigned tasks. Members were to report to the project manager and discuss their thoughts of what they thought of for the waterfall methodology.

Week 5 (August 16th)

During week 5, members presented their final deliverables through a presentation to their peers. Each member was assigned to discuss what they did in detail. Once the presentation was done, the project manager handed in the presentation, reports and journal in as a final deliverable

Work Breakdown Structure (WBS)

Task ID Number			
1	Project Planning		
1.1	Identify Project Goal and Topic		
1.2	Assign specific roles to team		
1.3	Research Functionality		
1.4	Create Project Timeline		
2	Logo Design		
2.1	Research Inspiration		
2.2	Concept Development		
2.2.1	. [Brainstorm and sketch initial concepts]		
2.2.2	. . [Develop design concepts]		
2.2.3	. . . [Review and refine concepts with team]		
2.3	Design Creation		
2.3	. [Create initial design drafts]		
2.3.1	. . [Incorporate feedback and make revisions]		
2.3.2	. . . [Finalize logo design]		
2.4	Finalization		
2.4.1	. [Prepare final logos]		
3	Style Tile		
3.1	Research Inspiration		
3.2	Concept Development		
3.2.1	. [Create Moodboards]		
3.2.2	. . [Develop initial style tile concepts]		
3.2.3	. . . [Review and refine concepts with team]		
3.3	Design Creation		
3.3.1	. [Create Initial Style Tile drafts]		
3.3.2	. . [Incorporate feedback and make revisions]		
3.3.4	. . . [Finalize Style Tile]		

3.4	Finalization		
3.4.1	. [Prepare final style tile files]		
4	App Mockups (5-10 pages)		
4.1	Research Inspiration		
4.2	Concept Development		
4.2.1	. [Create wireframes]		
4.2.2	. . [Develop initial mockup concepts]		
4.2.3	. . . [Review and refine concepts with team]		
4.3	Design Creation		
4.3.1	. [Create initial app mockup drafts]		
4.3.2	. . [Incorporate feedback and make revisions]		
4.3.3	. . . [Finalize app mockups]		
4.4	Finalization		
4.4.1	. [Present final app mockups to team]		
4.4.2	. . [Make final adjustments based on feedback]		
4.4.3	. . . [Prepare final app mockup files and deliverables]		
5	Single Page Mockup		
5.1	Research Inspiration		
5.2	Concept Development		
5.2.1	. [Create wireframe for website]		
5.2.2	. . [Develop initial website design concepts]		
5.2.3	. . . [Review and refine concepts with team]		
5.3	Design Creation		
5.3.1	. [Create initial website design drafts]		
5.3.2	. . [Incorporate feedback and make revisions]		
5.3.3	. . . [Finalize the website design]		
5.4	Development		
5.4.1	. [Develop HTML/CSS/JS for the website]		

5.4.2	. . [Test and debug the website]		
5.4.3	. . . [Finalize the website development]		
5.5	Finalization		
5.5.1	. [Present final website]		
5.5.2	. . [Make final adjustments based on feedback]		
5.5.3	. . . [Launch the website]		
6	Responsive Email Template		
6.1	Research Inspiration & Functionality		
6.2	Concept Development		
6.2.1	. [Create wireframe for email template]		
6.2.2	. . [Develop initial email template concepts]		
6.2.3	. . . [Review and refine concepts with team]		
6.3	Design Creation		
6.3.1	. [Create initial email template drafts]		
6.3.2	. . [Incorporate feedback and make revisions]		
6.4	Development		
6.4.1	. [Develop HTML for email template]		
6.4.2	. . [Test and debug the email template]		
6.4.3	. . . [Finalize the email template development]		
6.5	Finalization		
6.5.1	. [Make final adjustments based on feedback]		
6.5.2	. . [Deliver final email template files]		
7	Presentation & Report		
7.1	Development		
7.1.2	. [Outline presentation and report content]		
7.1.3	. . [Gather and organize content]		
7.2	Design Creation		
7.2.1	. [Create initial presentation and report drafts]		

7.2.2	. . [Finalize the presentation and report design]		
7.3	Finalization		
7.3.1	. [Deliver final presentation and report files]		

The WBS breaks projects into smaller, more manageable components or tasks. It is a visual tool that breaks down the entire project to make it easier to plan, organize, and track progress.

A bar chart that shows the amount of work done completed in at a certain time, in our case this was our timeline.

- Phase 1: Project Planning
- Phase 2-3: Design (Logo & Style Tile)
- Phase 4: App
- Phase 5: Website
- Phase 6: Email Template
- Phase 7: Finalization & Report

Gantt Chart

Our Design Deliverables

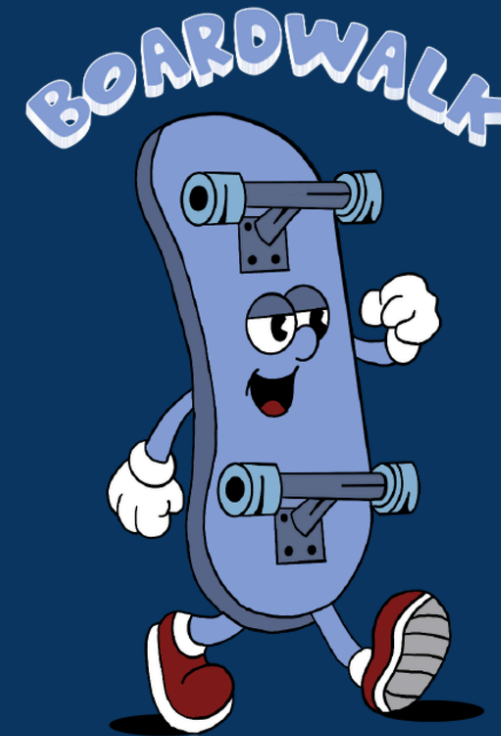

VISUAL ELEMENTS

Our Logo

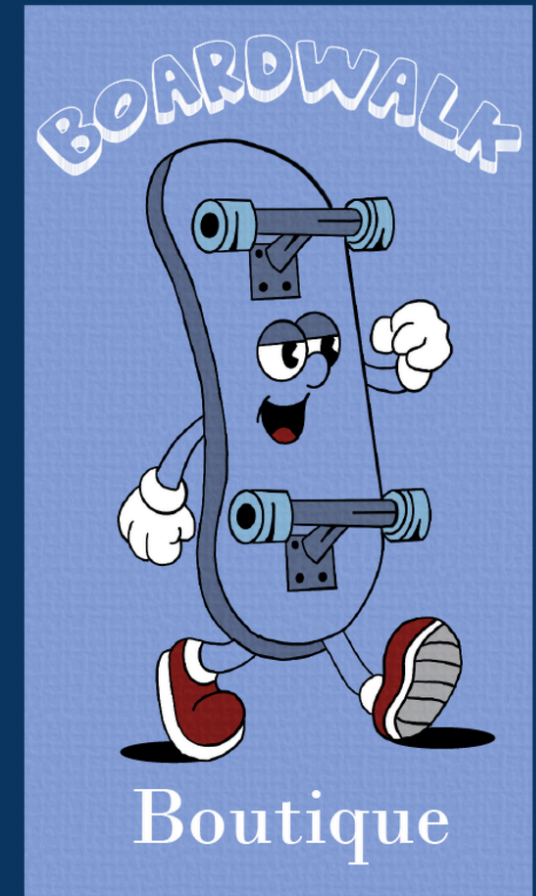

VISION AND INSPIRATION

Our main logo was our skateboard mascot, with the name of our company. We wanted to make something fun and playful.

For the secondary logo, we went for a simplistic and minimalistic look, with the main point on the name of our company, Boardwalk Boutique.

Style Tile

Our Final Style Tile

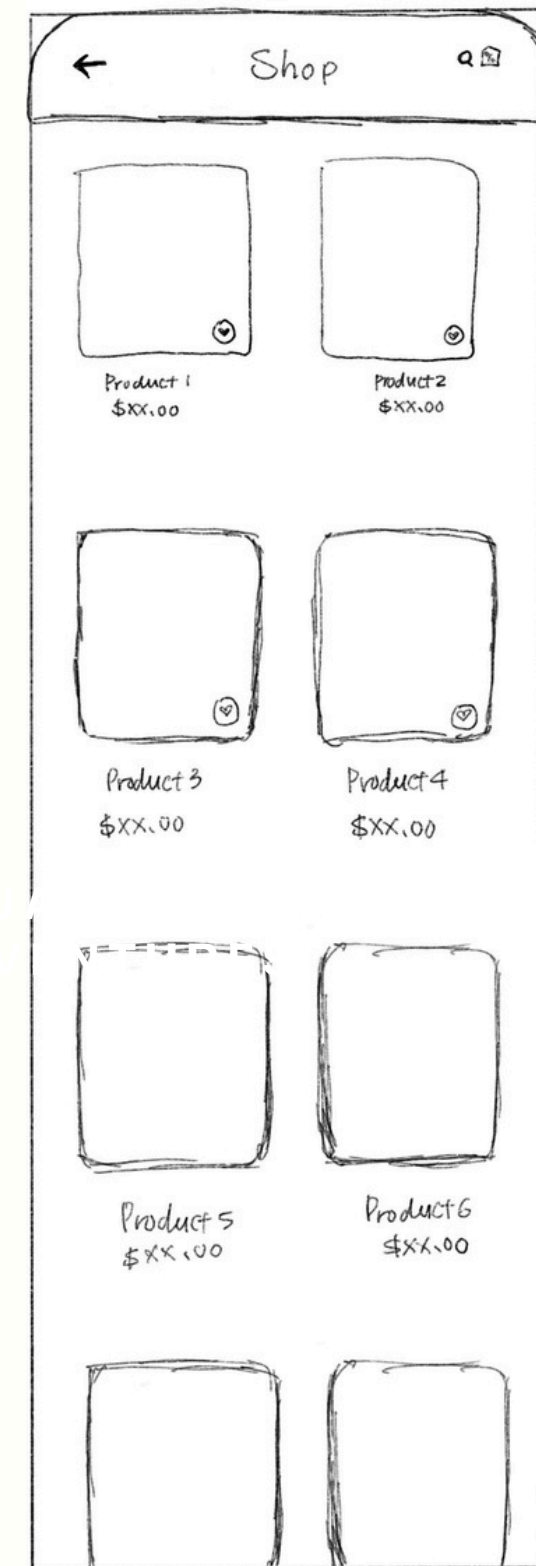

This was our final style tile with all colors and typography we used.

Phone App Mockup

VISUAL ELEMENTS

Lo-Fidelity Sketch

This was our lo-fidelity sketch for the mobile app. We wanted to make sure that there was a product catalog.

pretty similar to shop, rental,
favourites.

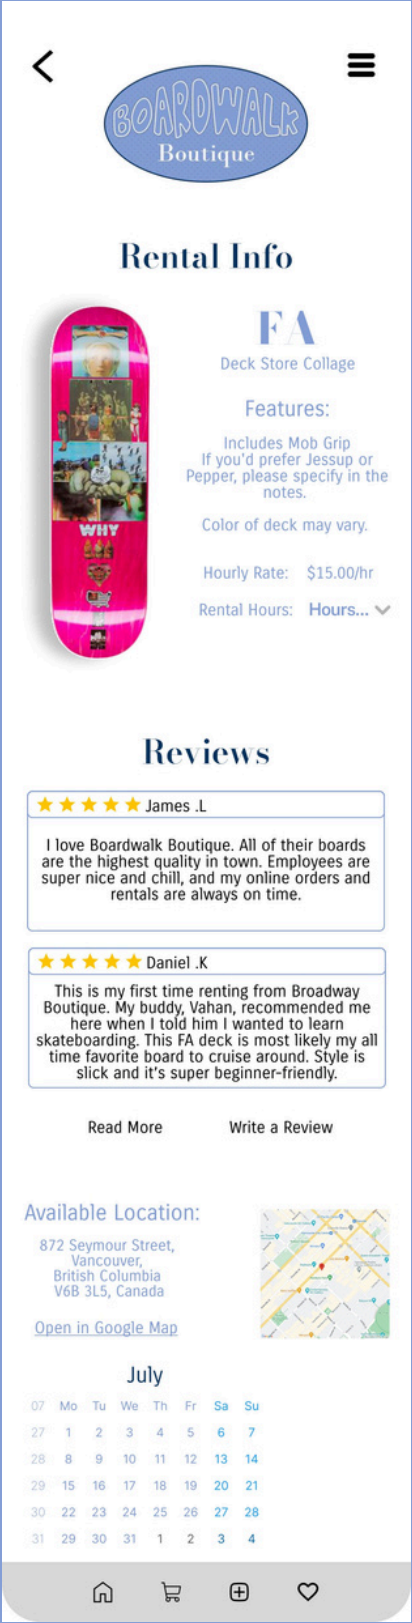

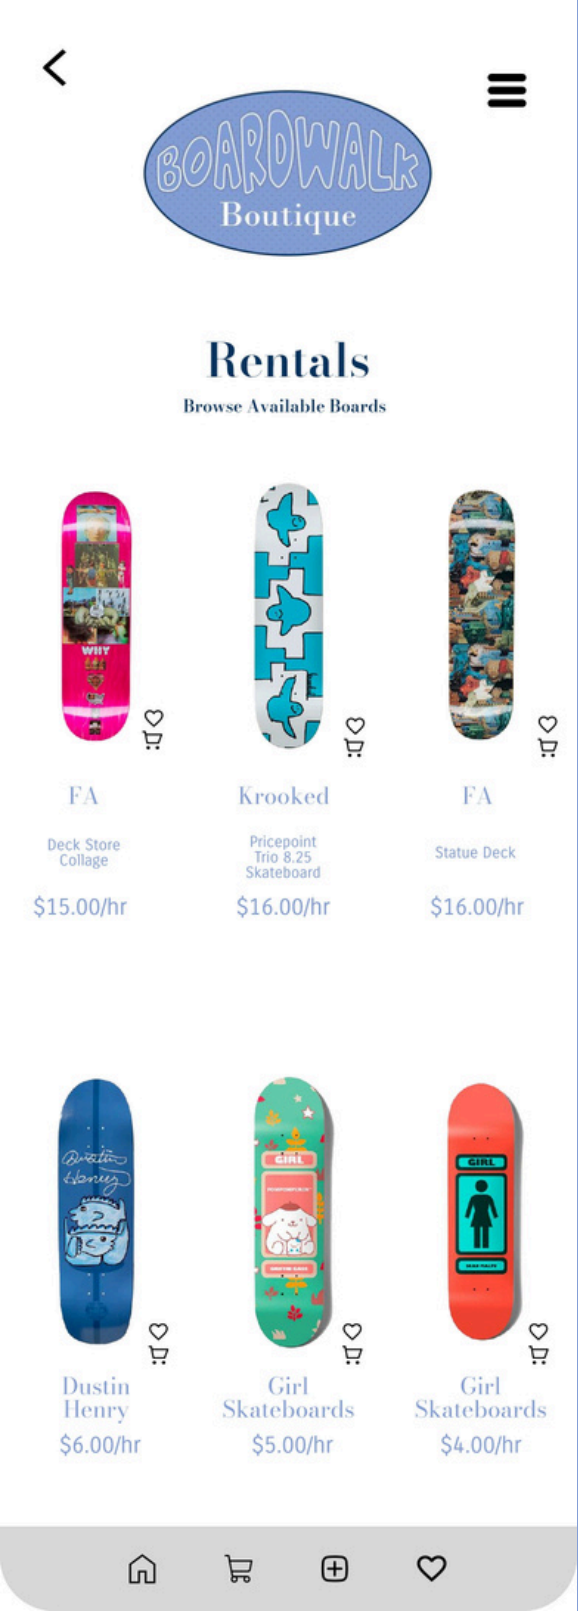

Lo-Fidelity Mockups

These were our other lo-fidelity mockups.

We wanted to emphasize our products and categorize them into the sections they belonged to.

As well, we want to ensure there was a recommendations feature so that the customers could have items recommended to them when they clicked on an item they were interested in.

Hi-Fidelity Mockups

Finally this was our hi-fidelity mockup for one functionalities, which was our rental services.

We wanted our customers to have as many selections of skateboards they could rent out. The price was listed and charged by the hour.

We also wanted to ensure that customers could also have the option to put the boards in their wish list and shopping carts.

Customers were also given the option of the dates they wanted to rent out.

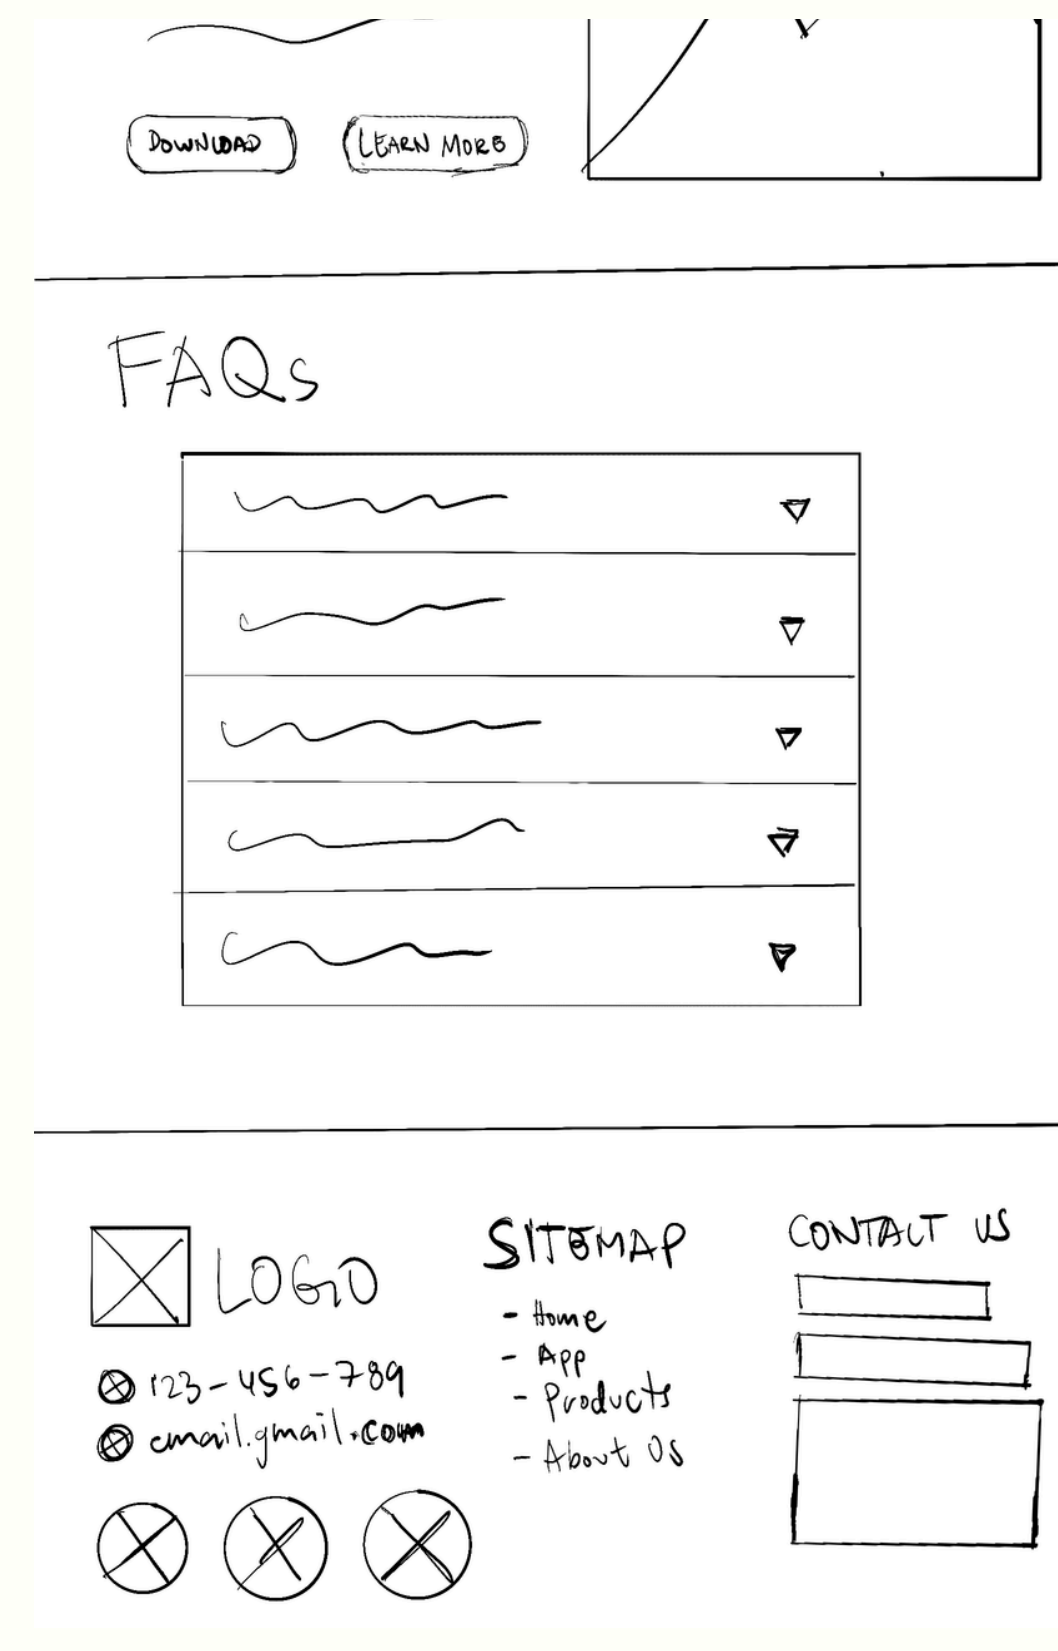

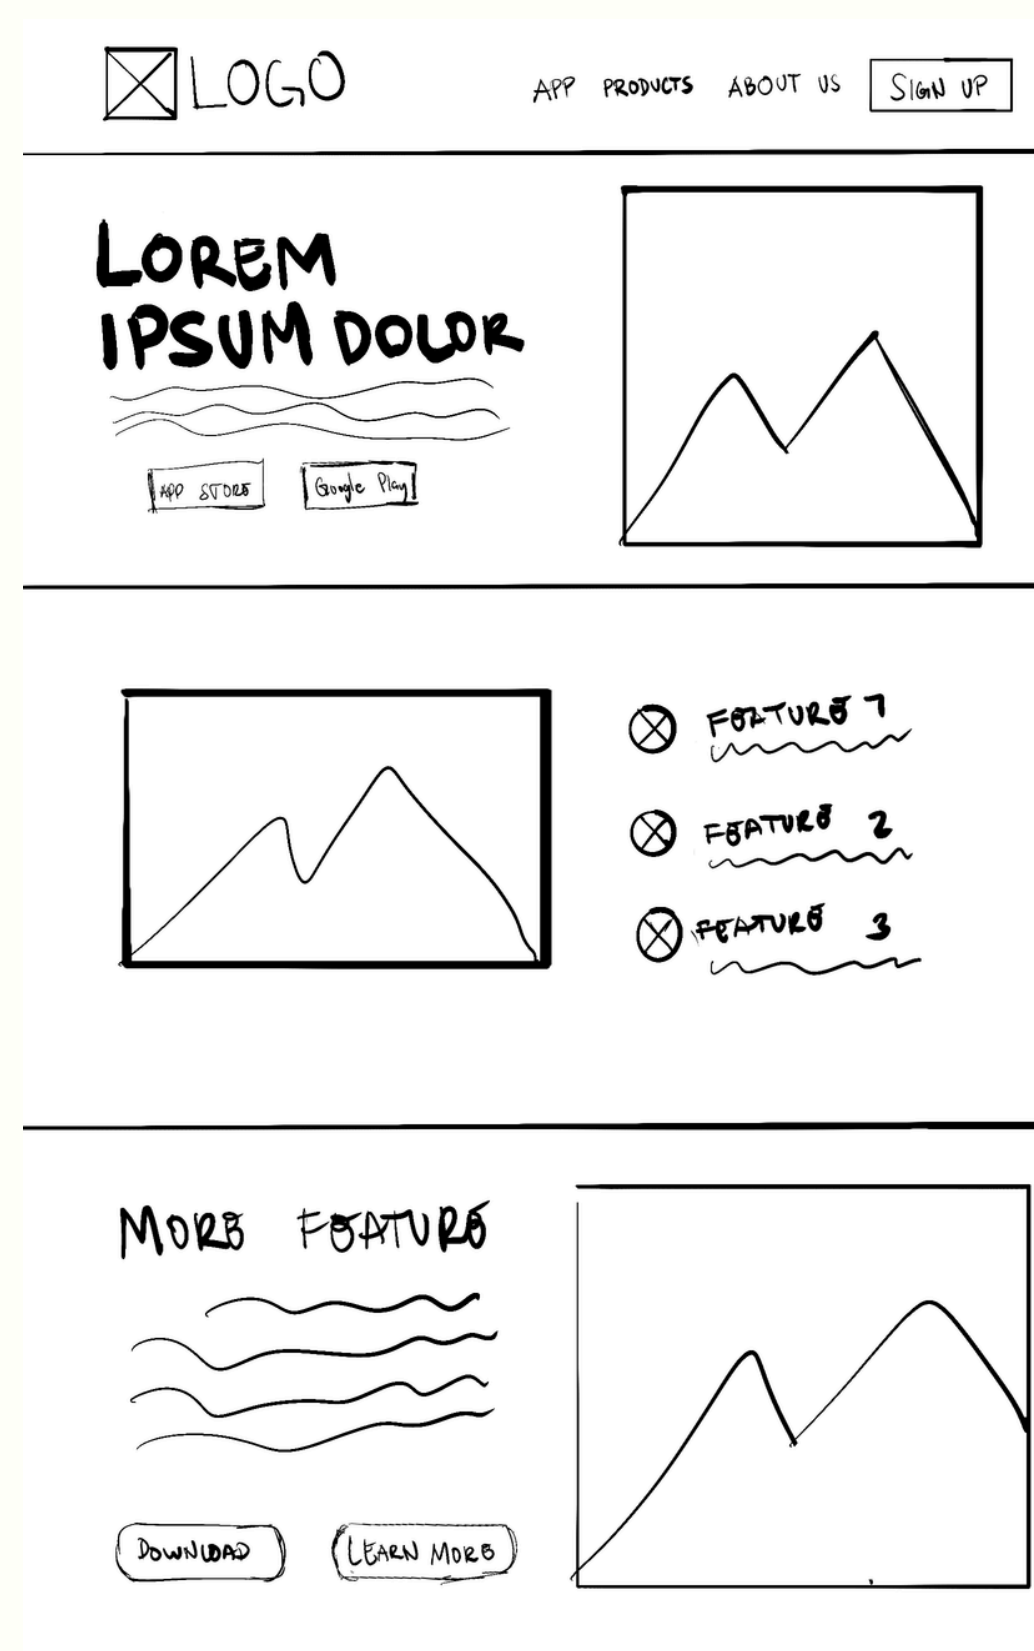

Website Mockup

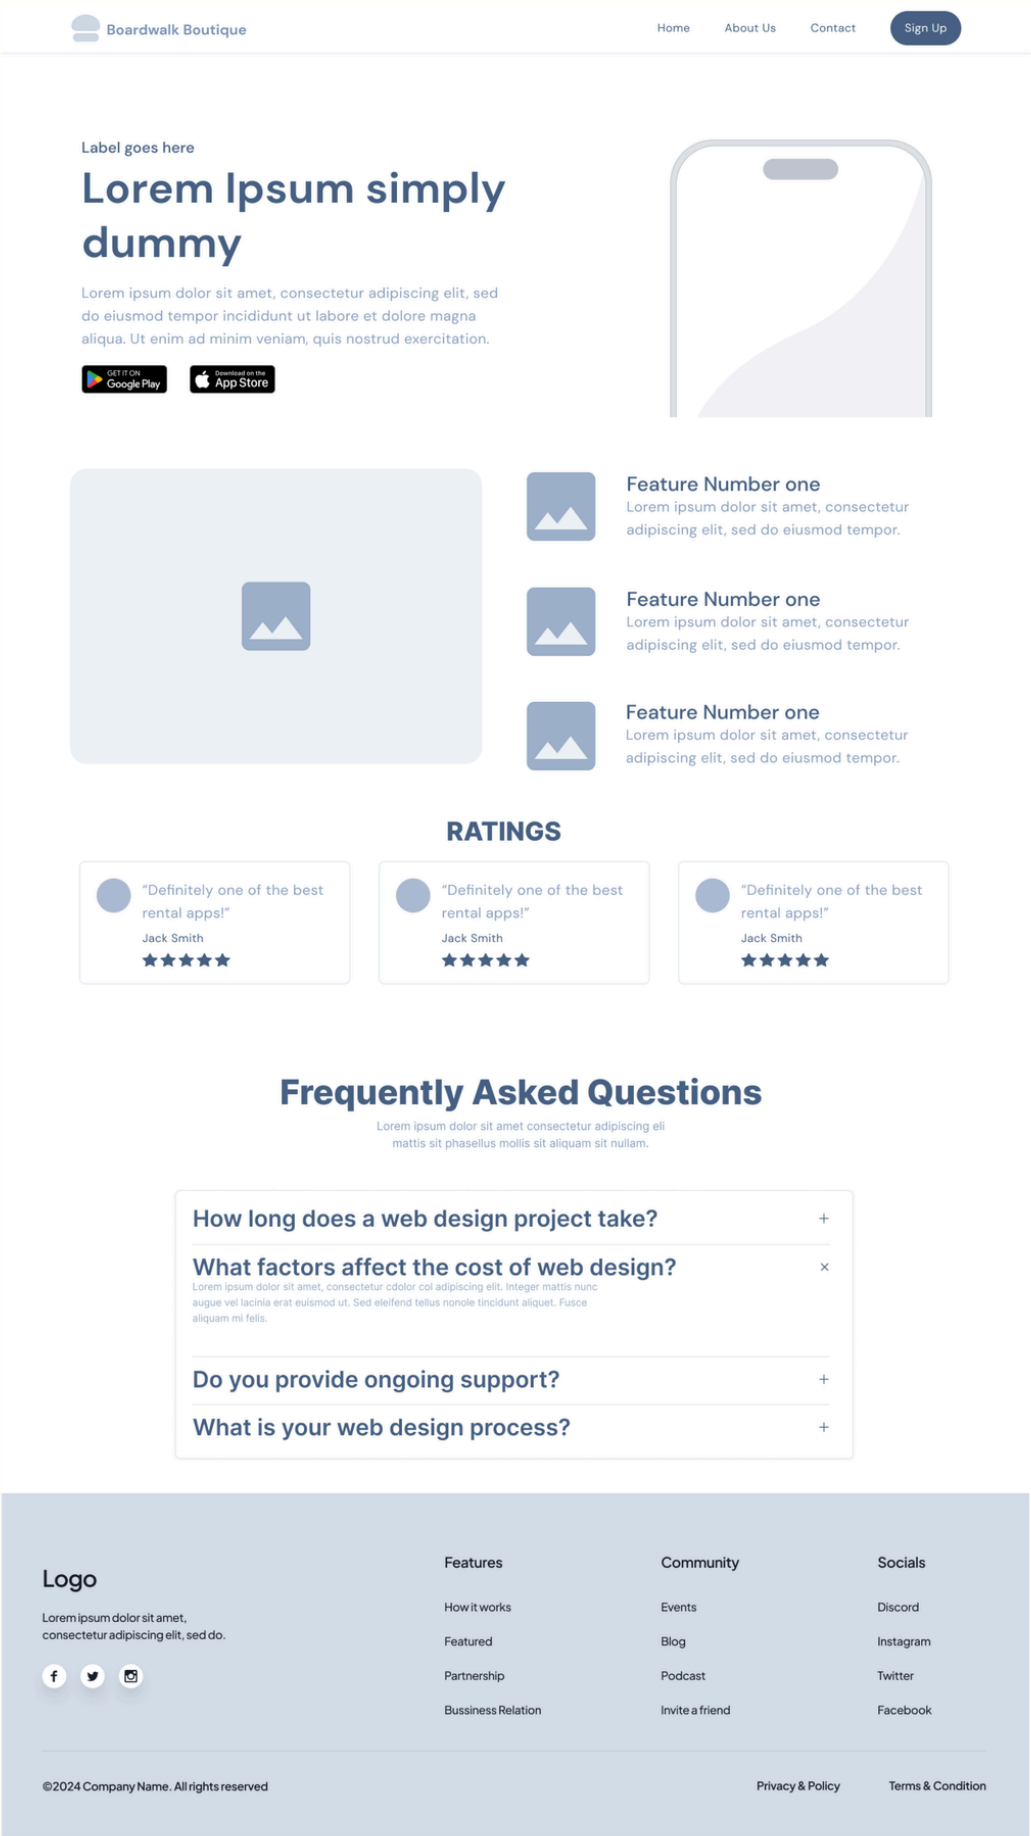

VISUAL ELEMENTS

Lo-Fidelity Wireframe

We initially had our website wireframe sketched out before we moved on to Figma.

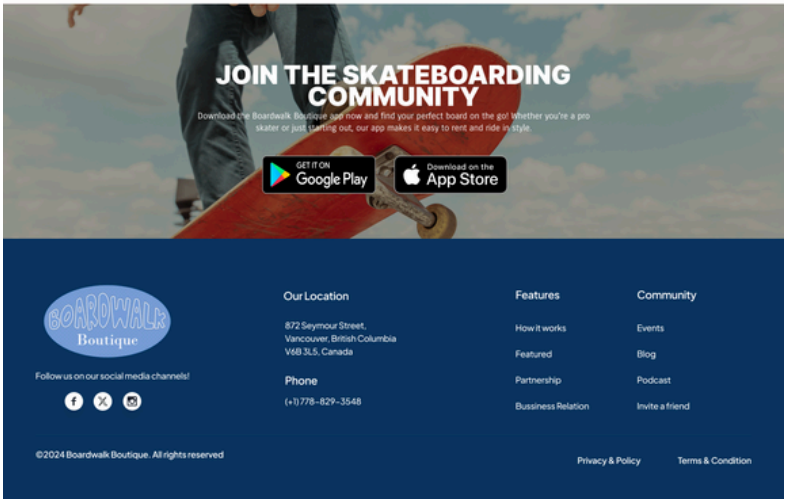

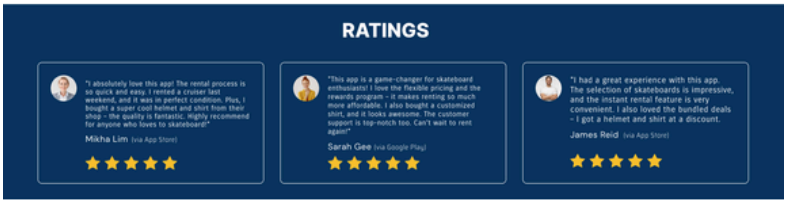

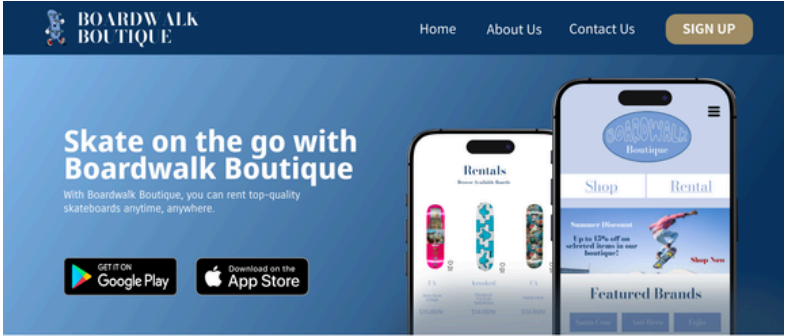

The main focal point was to encourage customers on downloading our app.

Lo-Fidelity Wireframe

This was the result of our lo-fidelity wireframe in Figma. Our main call to action was to encourage our customers and users to download our app.

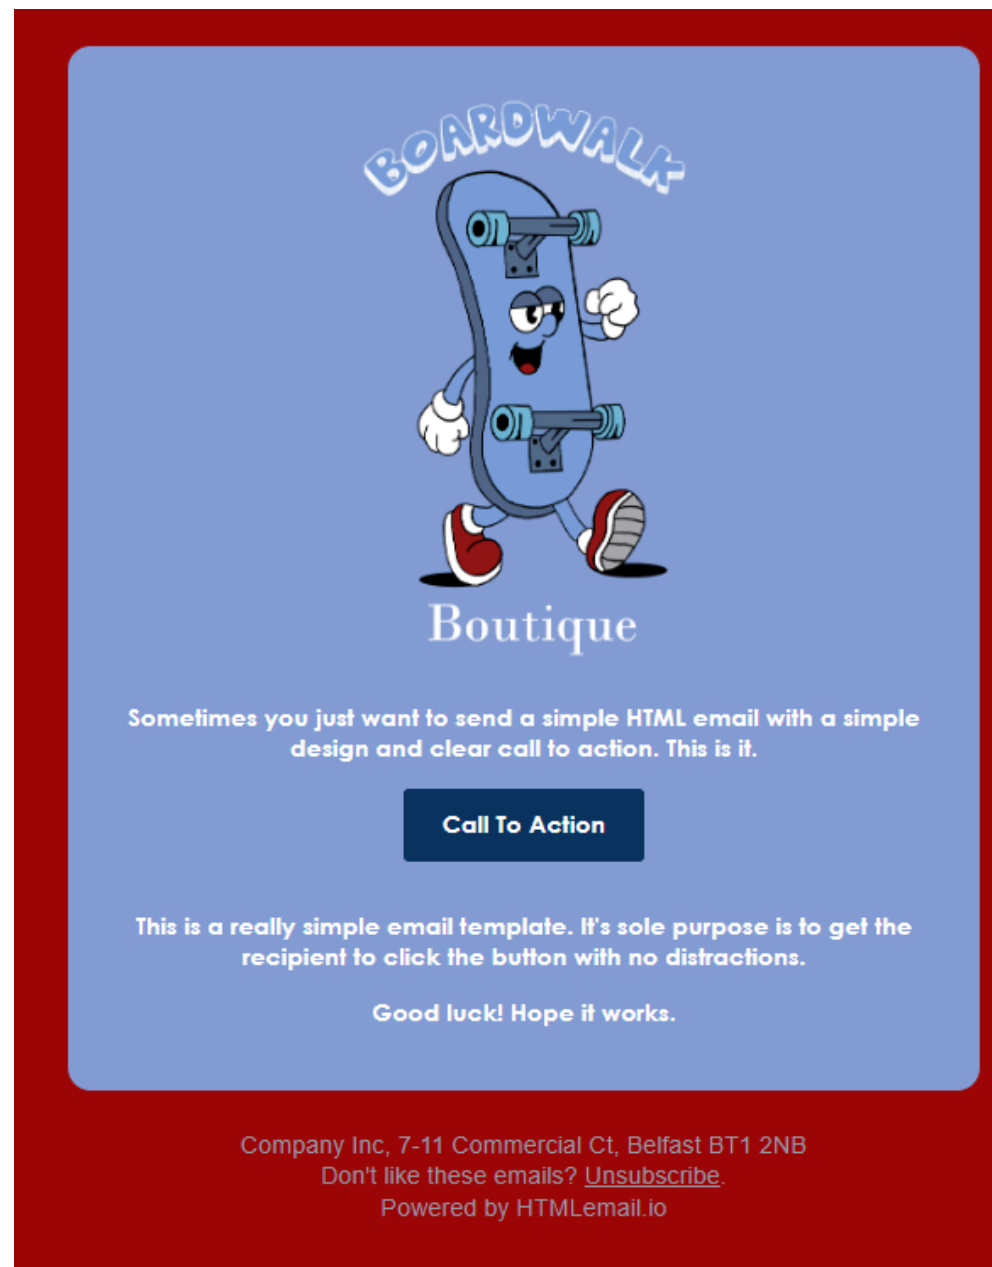

Hi-Fidelity Wireframe

This was our final hi-fidelity wireframe. We highlighted that our app was readily available to be downloaded on both Google Play and the Apple Store.

Our main emphasis was on our rental services.

Email Template

VISUAL ELEMENTS

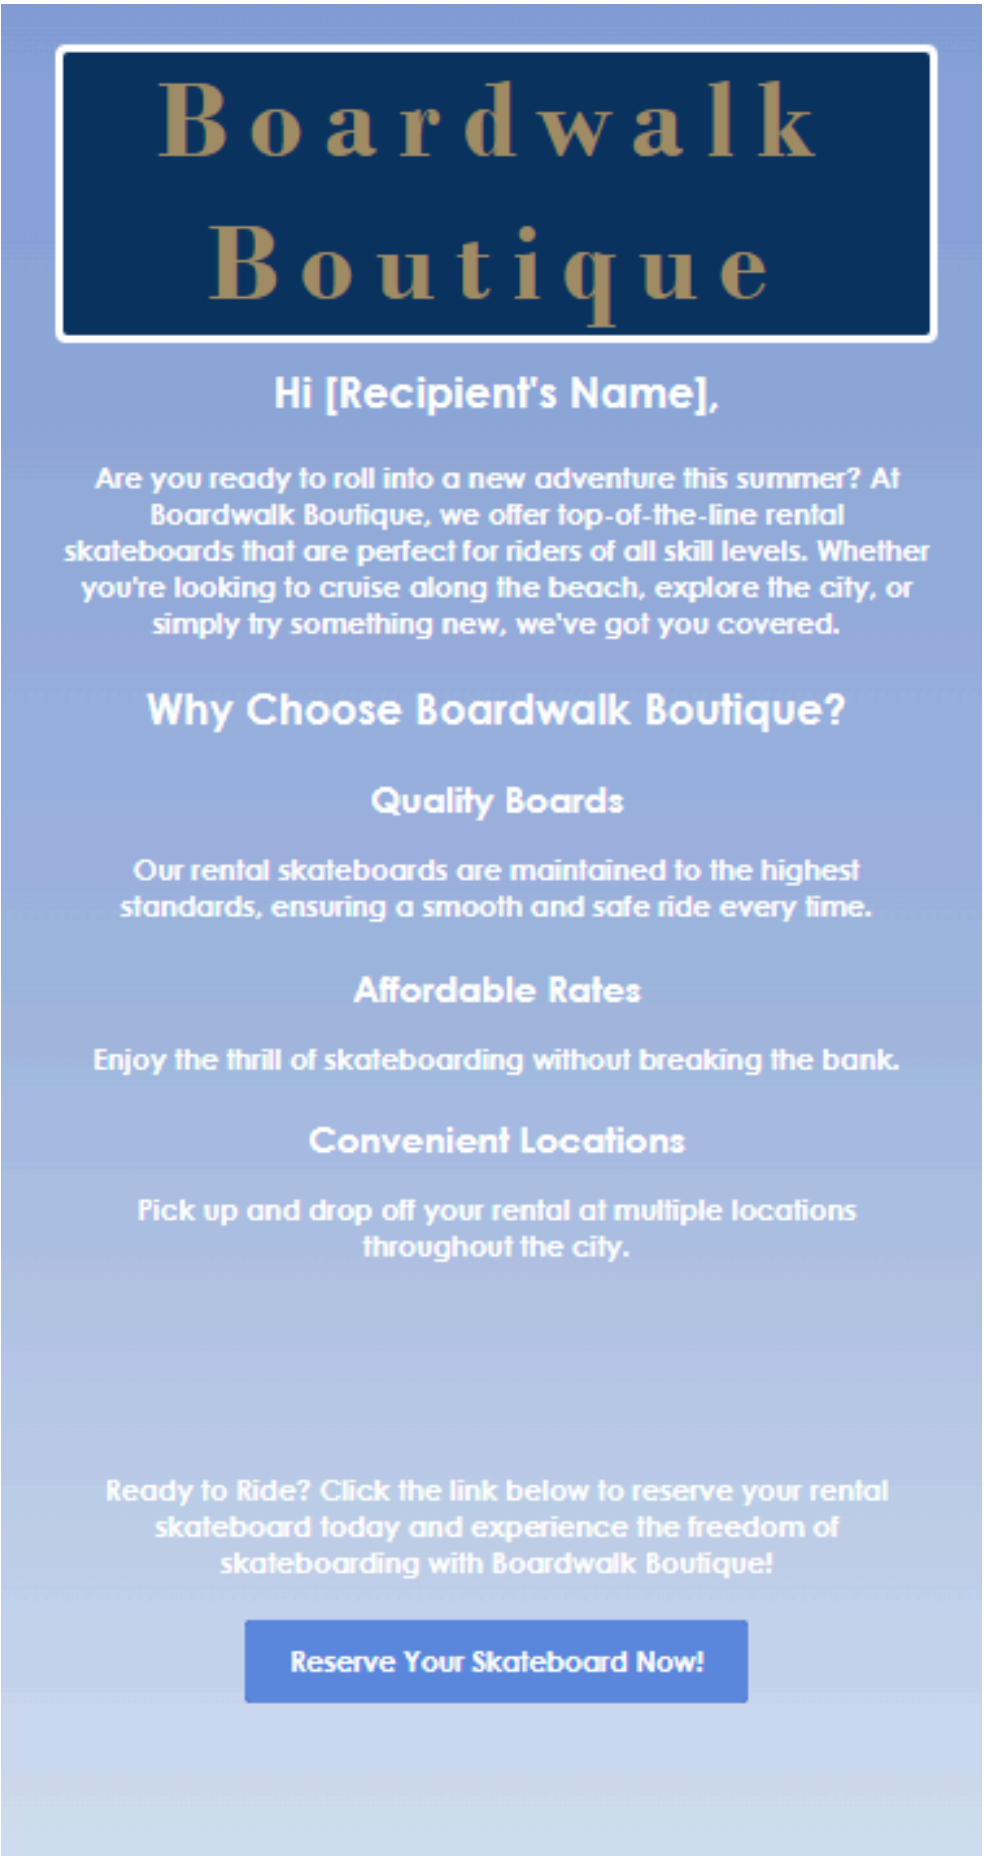

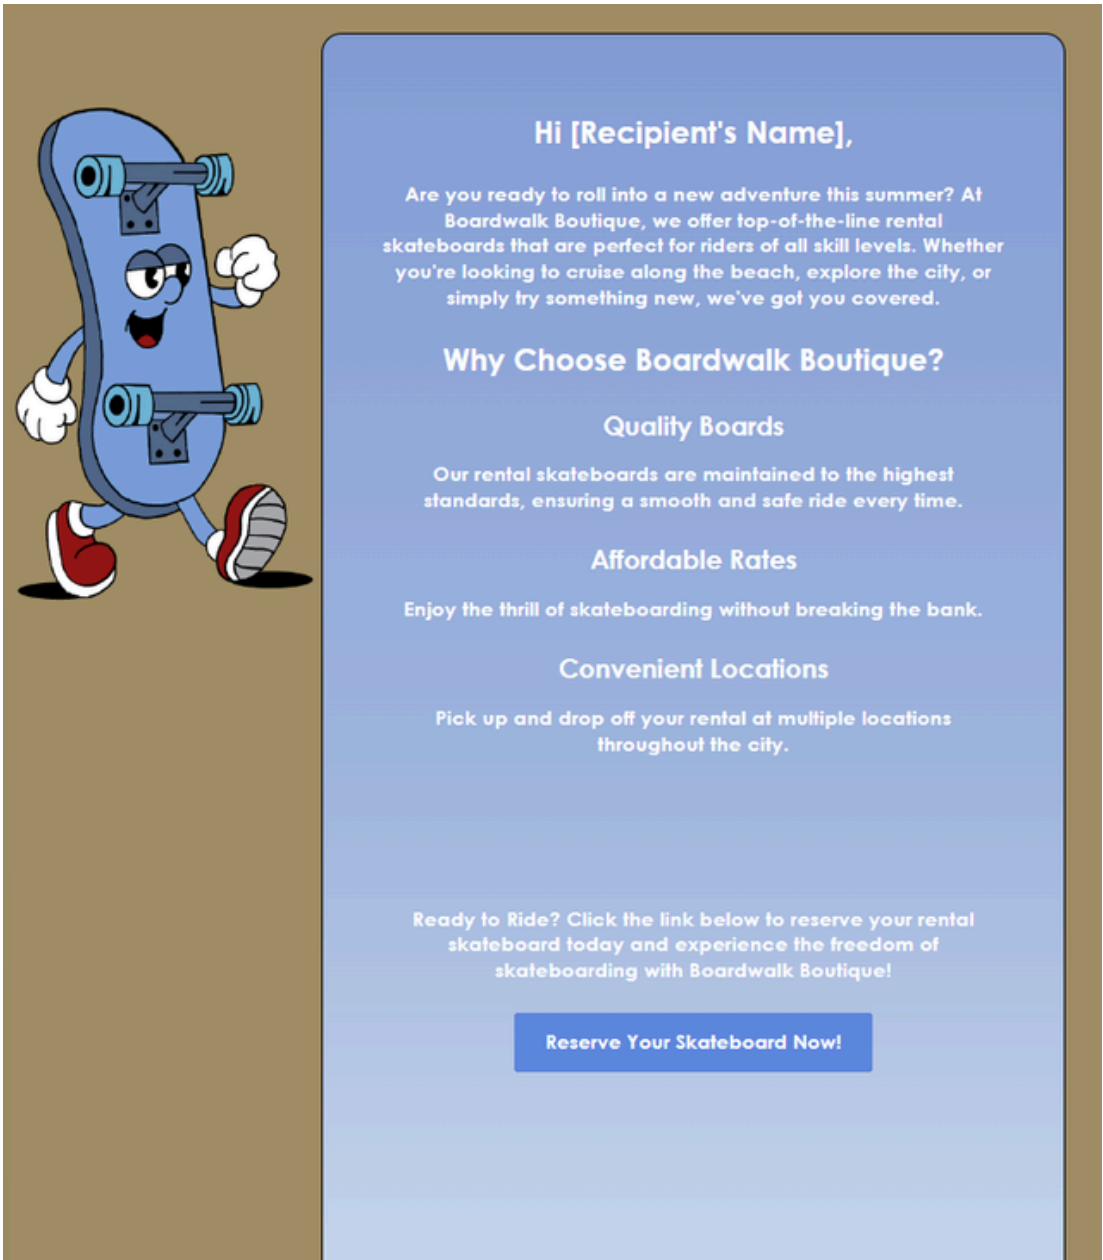

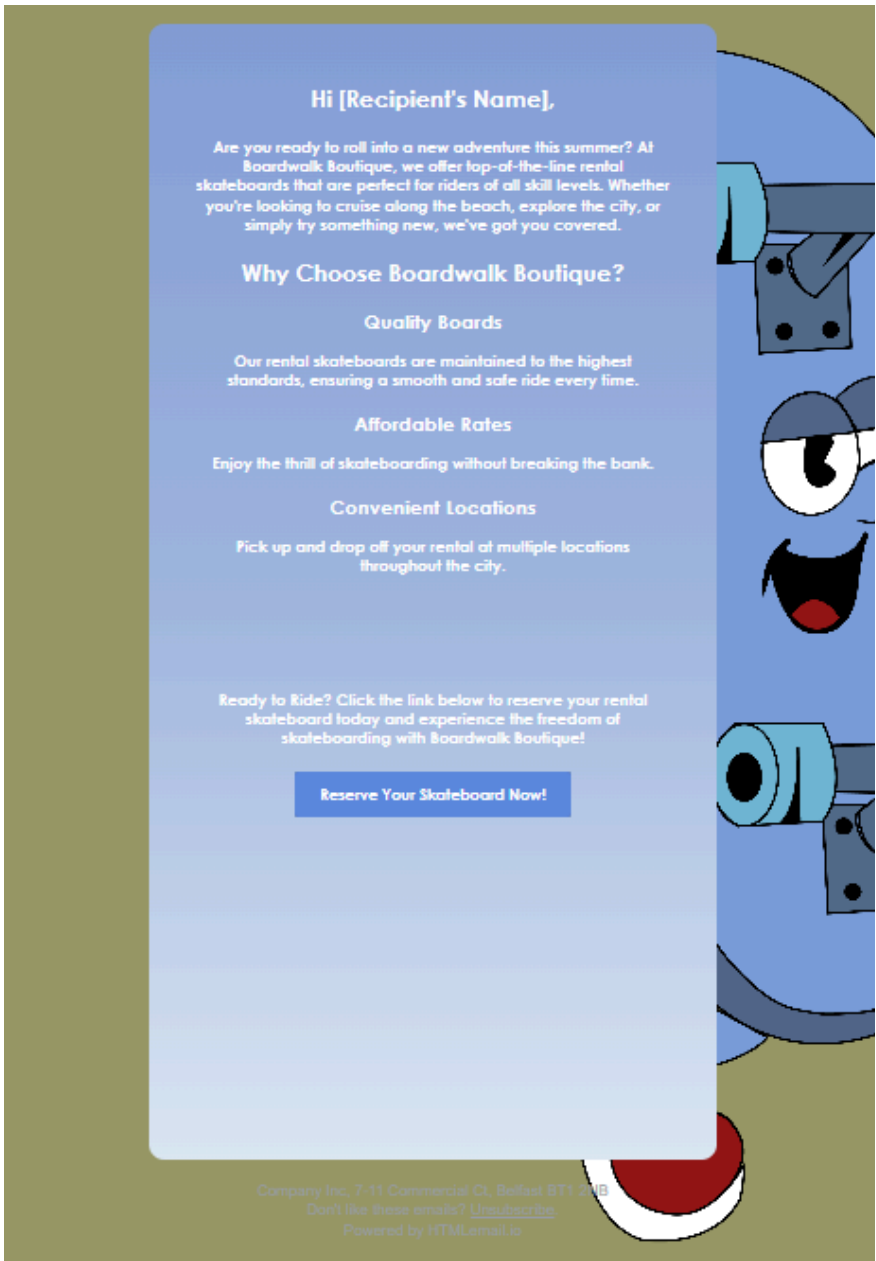

Initial Drafts

This was our initial email template. We played with the colors and logo our company.

We also had a call to action button to highlight our rental services.

Initial Drafts (cont.)

Some more of our initial email templates and the evolution.

Hi [Recipient's Name],

Are you ready to roll into a new adventure this summer? At Boardwalk Boutique, we offer top-of-the-line rental skateboards that are perfect for riders of all skill levels. Whether you're looking to cruise along the beach, explore the city, or simply try something new, we've got you covered.

Why Choose Boardwalk Boutique?

Quality Boards

Our rental skateboards are maintained to the highest standards, ensuring a smooth and safe ride every time.

Affordable Rates

Enjoy the thrill of skateboarding without breaking the bank.

Convenient Locations

Pick up and drop off your rental at multiple locations throughout the city.

Ready to Ride? Click the link below to reserve your rental skateboard today and experience the freedom of skateboarding with Boardwalk Boutique!

Final Email Template

This was our final email template.

After playing around with the color and design, we went for something simplistic and minimalistic.

We had main three points on why our customers should choose Boardwalk Boutique: quality boards, affordable rates and convenient locations.

Our **call to action** was for customers to reserve and rent a skateboard from Boardwalk Boutique.

Waterfall Methodology

OUR TAKEAWAY

REVISED GANTT CHART

Update the Gantt chart to reflect longer or shorter durations for each phase

EXTENDED PROJECT TIMELINE

Extend the overall project timeline to accommodate the part-time nature of the team.

LESS FREQUENT MEETINGS

Schedule meetings less frequently to fit part-time schedules, but ensure they are longer and more comprehensive.

Part Time Adjustments

Full Time Adjustments

We would adapt the waterfall model for similar projects with a full time team by implementing the following:

DAILY STANDUPS

Ensure all team members are aligned with their tasks and any roadblocks that may face.

DESIGN WORKSHOPS

Have more collaborative sessions with designers and developers to create detailed designs.

AUTOMATED TESTING

Implementing automated tests where possible to increase efficiency

User Story Approach

BRAINSTORMING

As a group, we collectively brainstormed who our ideal users would be (i.e. customers, skateboard enthusiast).

RESEARCHING

Once we knew who our ideal users were, we researched websites to get a better understanding of what our overall branding and design would be.

FINALIZATION

With all our information collected and gathered we were able to use our inspiration to design and develop what Boardwalk Boutique would entail.

User Story Examples

As a customer and skateboarder, I want to browse available skateboards for rent so that I can choose one that fits my needs.

As a customer I want to add items to my wish list so that I can purchase them later.

As a customer, I want to browse a variety of skateboarder aesthetic clothing so that I can find items that suit my style.

Our Perspectives

COURTNEY

I like the waterfall method as it's straightforward and you can see the progress in a straight, linear fashion. The one thing that did raise concerns for me is the fact that if there was an adjustment for a later deliverable the previous deliverables would have to go back and re-edit their parts.

VAHAN

I found that the waterfall model had a nice clear structured approach. This was helpful for tracking any kind of progress and keeping our focus. As the graphic designer for this project, I didnt face many problems, but the flexibility and continuous feedback from the agile method was something I appreciated.

KARLEIL

I enjoyed the Waterfall method because it's more straightforward and easier to work with. Its linear approach allows for clear planning and execution, which helps in managing projects efficiently.

SONYA

I actually enjoyed Waterfall model more as a team because we don't go back and change ideas, style guides or anything in general. Compared to Agile, this is a lot easier to work with as we set the ideas and designs in the beginning and have to stick to it throughout the whole project. Even though there is less flexibility, as someone who hates going back and forth on concepts I definitely prefer the Waterfall model over Agile.

DANIEL

I find the Waterfall model organized and helpful for keeping things on track with clear steps, but it can feel too rigid when changes are needed. It doesn't allow me to go back and adjust things easily, which can be frustrating. I might prefer a more flexible approach that lets me adapt as I go.

Conclusion

OUR TAKEAWAY & THOUGHTS

SUMMARY

Boardwalk Boutique is a local based ecommerce website that specializes in renting skateboards and sells skateboard aesthetic clothing.

The functionalities included:

- Rental services
- Product catalog
- Wishlist
- Online ordering (purchasing)

KEY TAKEAWAYS

Overall key takeaways for the waterfall methodology was that we enjoyed how linear the project timeline was, it allowed for a clearer and more straightforward visualization of our progress.

However, if there was a roadblock faced, we would have to adjust the timeline.
